**AN EXCLUSIVE  
NEW SERVICE FOR KEY  
CUSTOMERS...**

# Hydraulic Hose 24/7! for selected customers

Due to popular demand, Integraflex has introduced a full hydraulic hose & fittings service to complement our industrial rubber, composite, stainless/PTFE and thermoplastic hose business.

**1** We now offer a "while you wait" hose assembly service at Riverside Park, Middlesbrough using fully compatible hydraulic hose & fittings which are manufactured under ISO-9001 quality assurance standards, by fully trained staff.

**2** Alternatively you can arrange for a free of charge site visit\*, and we will come to you with our fully equipped mobile workshop, where we can inspect and measure any existing or failed hoses and manufacture a replacement hydraulic hose there & then.

**3** Or simply phone or e-mail us with the information in the box below, we'll give you a quote and if you can wait we'll manufacture the hose and deliver to site, free of charge\*, within 24 hours, normally same-day.

It's entirely up to you, which service you require.

### HOSE INFORMATION REQUIRED

- Hose Assembly application
- Working Pressure
- Overall length of assembly
- Bore size of hose
- What type of end fittings e.g. Female straights, 90 degree females, Banjo?
- Threads required on both ends e.g. BSP, Metric, JIC
- Any special orientation of end fittings?
- Any special requirements e.g. spiral-guard, firesleeve, MSHA cover?

\*During normal working hours 08.30am to 17.00pm Monday to Friday( excluding UK Bank Holidays). We operate a standard call-out charge of £35 for out of hours work and a fixed hourly rate of £30 from leaving the depot to return. We do not charge a mileage charge. All labour charges will be confirmed prior to invoicing.

## No hidden extras!

We believe simple is good, and we have been a bit baffled by some of the elaborate pricing structures and invoices generated by some hydraulic hose companies

We will always offer you a **simple fixed cost** for the hose assembly you need.

**No extra charges** for end caps, pellet cleaning, or materials used by us when making your hose.

**The price we quote is the price you will be charged** and we guarantee you it will be very competitive. We don't charge a mileage charge and will only charge a call-out when you need an emergency hose out of hours, and a competitive hourly rate when we visit you out of hours.

## Why Integraflex?

We believe we are the only company in the area that has the technical expertise and manufacturing capabilities to offer a genuine 'one-stop shop-' for all your hose & fittings requirements, whether this is a large rubber water S&D hose or a small bore hydraulic assembly. Add to this a wealth of experience in hose, ducting & couplings, supported by ISO-9001 & 14000 accreditation for the manufacturing of hose assemblies, what more do you need?

## The right local stocks

Integraflex continues to invest in bigger and broader stock profiles, and we have always held plenty of stock locally as we believe this is the only way we can truly service your needs properly and as always we will work with you to hold any specific parts that you use on a regular basis. In the unlikely event of us not having the exact part in stock, we can normally get stock next working day.

## Not just hose... We also stock and supply a full range of ancillary products including...

- Male-Male Adaptors
- Tees, Y pieces & Crosses
- Blank Plugs
- Gauges
- Firesleeve – red silicone coated glass cover
- Absorbent Granules
- Reducing Bushes
- Bulkhead connectors
- Valves
- Spiralguard
- Oil absorbent pads, booms, sheets & Spill Response kits
- Hydraulic Oil
