PVC Strip Doors

- AN EXTREMELY COST EFFECTIVE SOLUTION FOR LARGE ROLLER SHUTTER DOORWAYS.
- REDUCE HEATING COSTS.
- CREATE A BETTER WORKING ENVIRONMENT
- ALLOWS THE PASSAGE OF NATURAL LIGHT ON SHORT WINTER DAYS.
- SUITABLE FOR BOTH PEDESTRIAN AND FORKLIFT TRAFFIC.
- QUICK & EASY TO INSTALL.
- MANUFACTURED TO SUIT YOUR SPECIFIC REQUIREMENTS.

Made to Measure Doors Made Simple with Integraflex

Simply call us with your door size (height x width)
OR we can measure on-site for you - no obligation.

Your door will be supplied as a kit with all the necessary hanging rails, strips cut to length and fitted with stainless steel hanging plates.

Quick and easy to install.

Installation service available on request.

PVC Safestrip is used for internal and external thermal partitions, as a barrier against fumes, dust or flying insects, birds etc. It may also be used to reduce noise levels between production areas and quiet areas. PVC Safestrip is made from a high quality, low toxic, Cadmium free PVC material offering extremely good clarity and consistency of colour and dimensional tolerances. PVC Safestrip will resist the continual passage of vehicular traffic. A "Buffer" quality is available for extreme conditions where "standard" material has a limited life.

01 CLEAR SAFESTRIP®

SafeStrip is made in a high quality, low toxic, Cadmium free PVC material offering extremely good clarity and consistency of colour tint and dimensional tolerances.

Part No.	Colour	Width mm	Thickness mm	Temperature
CS2002	Clear	200	2	-5°C to +60°C
CS3003	Clear	300	3	-5°C to +60°C
CS4004	Clear	400	4	-5°C to +60°C
OS3003	Clear	300	3	-5°C to +60°C
OS4004	Clear	400	4	-5°C to +60°C

02 COLD STORE

For low temperature applications SafeStrip is available with special qualities. Such applications include walk-in freezers and refrigerated vehicles.

Part No.	Colour	Width mm	Thickness mm	Temperature
CF2002	Clear	200	2	-15°C to +20°C
CF3003	Clear	300	3	-15°C to +20°C
CF4004	Clear	400	4	-15°C to +20°C

03 SUPER COLD STORE

A 'Super Polar Grade' is also available for deep freeze requirements.

Part No.	Colour	Width mm	Thickness mm	Temperature
SCF2002	Clear	200	2	-35°C to +10°C
SCF3003	Clear	300	3	-35°C to +10°C
SCF4004	Clear	400	4	-35°C to +10°C

07 MARKER STRIP

Marker strips can be used to highlight the door frame for increased safety awareness.

08 STAINLESS STEEL HANGING SYSTEM

Part No.	Description	Size
SS/984	SS Suspension Rail	984mm
SS/200	SS Hanging Plate	200mm
SS/300	SS Hanging Plate	300mm
SS/400	SS Hanging Plate	400mm

04 BUFFER STRIP

A "Buffer" quality of SafeStrip is available for demanding conditions, where standard material has a limited life.

Part No.	Colour	Width mm	Thickness mm	Temperature
BS3003	Clear	300	3	-5°C to +60°C
BS4004	Clear	400	4	-5°C to +60°C

05 DOUBLE BUFFER STRIP

For the most demanding impact conditions the "Double Buffer" option will increase the life of the screen further.

06 WELDING STRIP

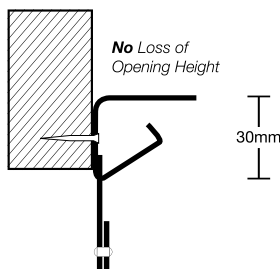

A specialist version of SafeStrip has been developed for use as welding curtains that meets specification EN1598. These are available in a variety of colours. A new matt finish option acts a diffuser of UV and IR radiation.

Part No.	Colour	Width mm	Thickness mm	Temperature
GS3002	Green Tint	300	2	-5°C to +60°C
BRS3002	Bronze	300	2	-5°C to +60°C
RS3002	Red	300	2	-5°C to +60°C

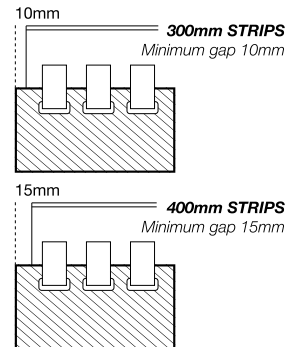

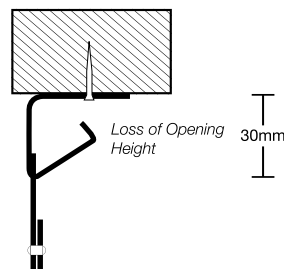

Hanging Systems

The PVC Strip Door can be mounted in two configurations dependant upon the space available. However, please check your delivery note to see which configuration has been catered for.
